Work with Team experience.

My Projects

Garments Management ERP (group project)

Live [↗](#)

Github [↗](#)

Feb 05, 2025 to Present

- A robust ERP system for garment industries, integrating Production, Order & Sales, Inventory, HR, and Accounts & Finance. It manages work orders, production stages, inventory tracking, customer orders, payroll, and financial transactions. The system ensures efficient workflow automation, real-time data , and improved decision-making, optimizing operations from raw material procurement to final product delivery.

- Tools Used: PHP ,Laravel, JQuery, Bootstrap, MySql

HR Management

| Live [↗](#) | Github [↗](#)

Php, jQuery, MySQL

Admin Login:

username: [Farzana](#)

Pass: admin123

A comprehensive HRM solution integrating payroll, leave, and attendance management. It automates salary calculations, , leave deductions, tax deductions, and payslip generation while ensuring compliance with labor regulations. Employees can request leaves, track balances, and view attendance records, while admins monitor work hours, and approval.

Portfolio Project:
